

Mean velocity across parameter combinations

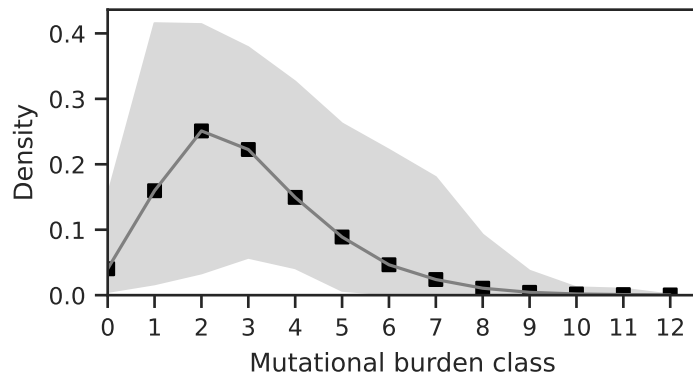

$N = 500, s = 0, U_d = 0.006, \sigma = 3 \cdot 10^{-6}, \phi = 0$
Mean Velocity = 1.0504 ± 0.3554 , $n = 200$ simulations

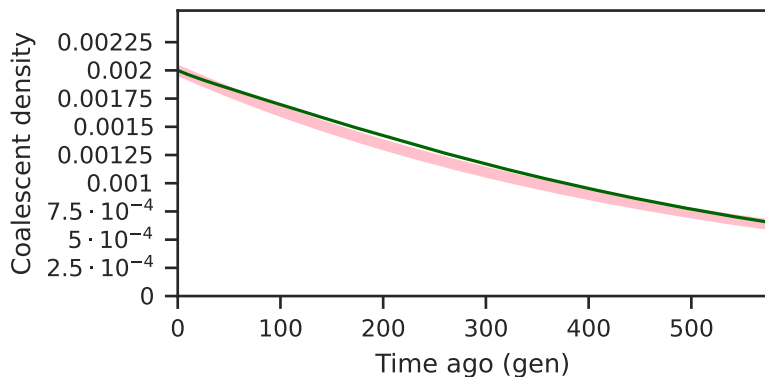

A Velocity Distribution

B Mutational burden profile

C Coalescent density predictions

D Population size predictions
