

Mean velocity across parameter combinations

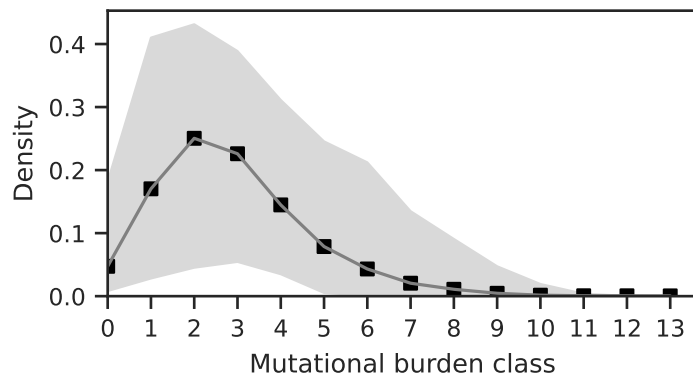

$N = 500, s = 0, U_d = 0.006, \text{sigma} = 3 \cdot 10^{-6}, \phi = 0$
Mean Velocity= $1.0145 \pm 0.3372, n = 200$ simulations

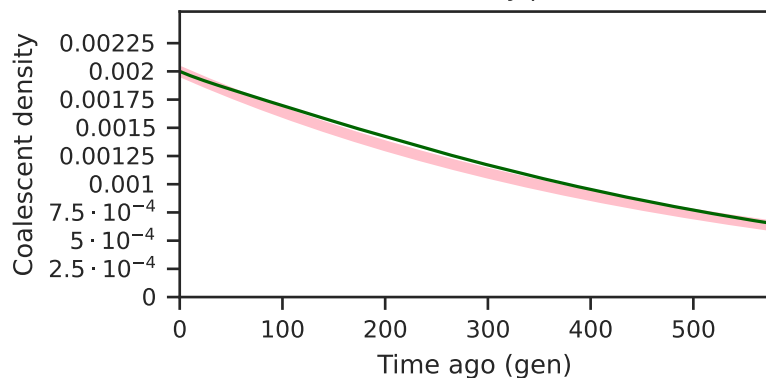

A Velocity Distribution

B Mutational burden profile

C Coalescent density predictions

D Population size predictions
